**ExpressCare by Affidea** provides the perfect alternative to busy Emergency Departments, treating minor injuries and illnesses which should not need to take place in a traditional, highly pressurised hospital setting. This significantly benefits the health system, freeing up capacity for those most in need of care.

**ExpressCare** promises fast turnaround times with no appointment or referral needed. Our Consultant-led clinics are staffed with A&E trained doctors and nurses. Our medical teams treat everything from fractures and sprains, cuts requiring stitches, sports and DIY injuries to minor burns and scalds, eye and ear injuries, insect and animal bites, and fevers, infections and rashes.

**ExpressCare** offers a complete patient pathway and has on-site consultant clinics in disciplines such as orthopaedics, physiotherapy and plastic surgery, offering weekly clinics to follow up on any more serious injuries.

**ExpressCare** is open to everyone on a fee-for-service basis, or is a covered benefit with Laya Healthcare and Irish Life Health, dependent on the plan.

## **Additional services**

**ExpressCare** has the added benefit of a full suite of Affidea medical imaging available on site – MRI, Ultrasound, X-Ray, CT & DXA scans – dependent on location.

### Kathleen

Great experience at ExpressCare. They checked my daughter's ankle for a suspected fracture, used a precautionary cast while waiting for X-ray analysis and then followed up swiftly and comprehensively. Admin, nursing and doctors were all welcoming, kind to my daughter and took every precaution to check her injury and advise how to proceed. Thanks everyone!

### Ronan

I went to ExpressCare after a 9 hour wait in A&E... then I was in and out under 2 hours! Plus unlimited tea and coffee or hot chocolate! Great service, highly recommend. Just drop in
